Vol III 918

Now there be strong silk, seventy-eight thousand, seven hundred and thirty-two 匹; make one hundred and sixty-two people share it.

We ask: how much receiveth each person?

Answer saith: four hundred and eighty-six 匹.

答得六百今  
曰：幾十三有  
四何？二十絹  
百八十七  
八分匹萬  
十之令八  
六問一千  
匹。人百七

$$\frac{78732 \text{ 匹}}{162 \text{ 人}} = 486 \text{ 匹/人}$$

Method saith: put down the strong silk, seventy-eight thousand, seven hundred and thirty-two 匹, as the dividend, and use the one hundred and sixty-two people as the divisor. Taking the dividend as per the divisor, ~~we~~ we are done.
