~~粟~~

Vol. I. 9110

A err. has '米粟求糲米'

for '以粟求糲米'

C err. has '糲' for ~~糲~~ '粟'~~糲~~
粟 = grain

糲: 米不精也; coarse grain

糲: 力制切, 音厲 lai6 11

~~糲~~糲 ^{probably} 糲
(米+16) (米+20)

糲 《康熙字典》《字彙》俗糲字

糲 《康熙字典》音作
糲 《增韻》精細米

糲: 精細米; fine grain

chok 8, chok 9, zuo

regular

粟米 I have rendered "uncooked grain" rather than grain & grain.

Seeking coarse grain with grain: triple it, and make five as one.

Seeking ^{regular} grain with coarse grain: quintuple it, and make three as one.

Seeking rice with coarse grain: quintuple it, and make two as one.

Seeking coarse rice with ~~uncooked~~ ^{regular} grain, sextuple it, and make four as one.

Seeking coarse grain with coarse rice, double it, and make five as one.

Seeking rice with fine grain, octuple it, and make four as one.

These are conversion rates for
traditio grain/ricereally "grain grain" 粟 being not fine/coarse;
米 being uncooked grain.

$$V(\text{糲米}) = \frac{3}{5} V(\text{粟})$$

$$V(\text{粟}) = \frac{5}{3} V(\text{糲米})$$

$$V(\text{糲飯}) = \frac{5}{2} V(\text{糲米})$$

$$V(\text{糲飯}) = \frac{2}{4} V(\text{粟})$$

$$V(\text{糲米}) = \frac{2}{5} V(\text{糲飯})$$

$$V(\text{糲飯}) = \frac{5}{4} V(\text{糲米})$$

糲
