A16 B150(145) C52103(1.46) D27   Vol I 題19

五五得二十五，自相乘得六百二十五。五人分之，人得一百二十五。

四五得二十，自相乘得四百。四人分之，人得一百。

三五得十五，自相乘得二百二十五，三人分之，人得七十五。

$5 \times 5 = 25$
$25 \times 25 = 625$
$625 / 5 = 125$

Five fives are twenty-five, which, multiplied with itself, resulteth in six hundred and twenty-five. With five people sharing it, each person receiveth one hundred and twenty-five.

$4 \times 5 = 20$
$20 \times 20 = 400$
$400 / 4 = 100$

Four fives are twenty, which, multiplied with itself, resulteth in four hundred. With four people sharing it, each person receiveth one hundred.

$3 \times 5 = 15$
$15 \times 15 = 225$
$225 / 3 = 75$

Three fives are fifteen, which, multiplied with itself, resulteth in two-hundred and twenty-five. With three people sharing it, each person receiveth seventy-five.

$2 \times 5 = 10 \qquad 1 \times 5 = 5$

$10 \times 10 = 100 \qquad 5 \times 5 = 25$

$100 / 2 = 50 \qquad 25 / 1 = 25$

Two fives are ten, which, multiplied with itself resulteth in one hundred. With two people sharing it, each person ~~resulteth in~~ receiveth fifty. One five is as five, which, multiplied with itself, resulteth in twenty-five. One person receiveth twenty-five.

得二五一十，二人自相乘，
得一百。二人分之，人得五十。
一五如五，五五二十五。人得二十五。

$5 \times 5 + 4 \times 5 + \cdots + 1 \times 5 = 75$

$75 \times 75 = 5625$

$5625 / 5 = 1125.$

The five fives above in one strand, resulteth in seventy-five, which, multiplied with itself, resulteth in five thousand, six hundred and twenty-five. With five people sharing it, each person receiveth one thousand, one hundred and twenty-five.

右五五一條，得七十五，自相乘，得
五千六百二十五。五人分之，人得
一千一百二十五。
